DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

As per claims 1, 8 - 10, the closest prior art of record, Stefik U.S Patent 5,715,403, and Schull U.S. Patent 5,509,070, taken either individually or in combination with other prior art of record fails to teach or suggest the legal copying of digital information by transferring (devolving) a license and protecting the transferred license information by using the media ID (specific equipment ID) of the transferee to generate a second encryption information with the transferee's ID for storage in the second storage medium. The Applicant further provides for the degeneration (inhibiting) of the first license information preventing it's further use on the first licensor's system.

The specific allowable feature, which distinguishes the present invention over the prior art is the daisy chain concept of passing on licensed information from one user to another by tying the access to the contents of the next user to the next user's specific equipment ID and degenerating the current license information in the current user's storage medium.

Claims 2 - 7 are dependent upon Claim 1 and thus have all the limitations of claim 1 and are allowable for that reason.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Waite et al. U.S. Patent 5,222,134 SECURE SYSTEMS FOR ACTIVATING PERSONAL COMPUTERS SOFTWARE AT REMOTE LOCATIONS.

Teaches about accessing licensed information after the equipment's ID has been incorporated into the use license.

3. Schull U.S. Patent 5,509,070 METHOD FOR ENCOURAGING PURCHASE OF EXECUTABLE AND NON-EXECUTABLE SOFTWARE. Teaches about the distribution of freely copy able software and the use of Target IDs.
